EDUCATION

Bachelor of Mathematics (Statistics) with Distinction Queensland University of Technology, GPA: 6.875/7.00	March 2021 — Nov 2024
Bachelor of Business (Economics) with Distinction Queensland University of Technology, GPA: 6.75/7.00	March 2021 — Nov 2024

EXPERIENCE

Economist Economic and Fiscal Policy, Ministry of Finance	Jan 2025 — Present Nuku'alofa, Tonga
• Forecasted GDP growth over Tertiary sub-sectors: Education, Public administration, and ICT sectors • Lead a researched Policy paper which analysed the PALM and RSE schemes in Tonga, highlighting the decline of seasonal workers, its adverse effects and recommending strategies to bolster Tonga's local market. • Compiling Tonga's annual Budget Strategy and Budget Statement publications for the Financial Year 2025 & 2026. • Extracting and classifying Government Financial Statistics to feed into monthly reports, quarterly updates to TSD, and to analyse Fiscal Indicators etc	
Statistics Tutor Alafolau Fakaako	Feb 2025 — July 29th Nuku'alofa, Tonga
• Delivered 2hr interactive Lecture and Exercise material for Year 12 & Year 13 students using pedagogy principles • Simulated experimental designs in Rstudio and provided sample assignments (eg: BMI case studies, Math hours studied, Long-Jump experiments etc) mirroring closely real assignment conditions for student practise • Classroom management and topic planning skills. Public speaking in front of a classroom but also dedicated one-on-one with students where required.	

PROJECTS

RSE & PALM scheme analysis , Ministry of Finance	Sept 2025 — Oct 2025
• Noting the circulating discussion of the loss of skilled workers through the seasonal work scheme, this paper established the important economic contribution of Labor Mobility for Tonga • Key findings highlighted the downward trend of seasonal worker intakes from Tonga - due to changes in deeds of Agreement in Australia and a potential loss of the partnership bubble for Tonga • Recommendations pointed towards strengthening long-term skills of the labor market locally.	
Modelling Customer Journey Cycles (Statistical Approach) , LogicKube (WIL project)	Aug 2024 — Nov 2024
• Industry-based application of Regression modelling; Monitoring Customer Journeys - using a Binomial GLM for a customer conversion rate analysis, and a Quasi-Poisson GLM for steps-to-conversion modelling with Attribution modelling to partition customer behavior at different granular levels (Meta etc) • Regular meetings with LogicKube manager to question aspects of the business that could improve the development of our models Final findings were compiled into a reproducible markdown file and presented as a pitch to LogicKube	
AGPC Market Analysis: Expanding the Consumer Base , Australia Grand Prix Cooperation (WIL project)	Aug 2024 — Nov 2024
• A holistic analysis of AGPC's business position to pinpoint Japan as a plausible market to attract for the Australian Grand Prix. This was done in a multi-disciplinary team with accounting, HR, marketing and economic majors. • Employed Customer Segment Analysis, Economic projections of potential revenue from Japan's market, and presented final solution in a business-styled pitch to client representative.
